A FLORIDA BLAZE.
Block of Business Houses and Several Dwellings Consumed—Loss One Half Million Dollars.
JACKSONVILLE, Fla., Aug. 18.—A path of smoldering ruins, two blocks wide and six blocks long to the river street, and one block south on each side, is the result of a fire which started at midnight. It caught in R. D. Knight & Co's grocery, adjoining the large Hubbard building, and in a very short time the block was a mass of flames. They then ran diagonally across to the Tremont hotel, thence to Colonel Badger's large house, in which the Seminoles club is situated. The flames spread on all sides, being fanned by a stiff breeze that rose. The flames worked headlong through the block, but nothing could stay the flames. They consumed for want of material. They were stopped at Blowers street, North Laura, on the west, and at Ocean street on the east. At 7 o'clock this morning, over twenty-five business houses are burned, and over forty dwellings. The loss is about one-half million dollars. Insurance about one-half.

HENRY CLEWS

Reviews the Situation and Outlook on Grain, Provisions, Cotton and Coffee.

Extracts from Henry Clews' circular, dated New York, August 15, on wheat, corn, provisions, cotton and coffee:

Wheat.—The bull feeling has had full swing this week and has even spread to the ranks of the bears, securing them nearly into a stampede to get out of their short contracts. One of the largest operators in the country was forced into covering about 2,000,000 bushels (according to report) of short wheat. The longs have realized some of their profits at the advance, but on the whole there has not been much disposition to sell wheat. Europe has again been a persistent buyer in the speculative, as well as the cash market, and there seems no limit as to the price they are willing to pay. Home buyers continue to be leary, and crop estimates are setting higher all the time, even some made by conservative people being as high as 500,000,000 to 600,000,000 bushels. Of these factors, the exports from the principal ones, they are calculated at 100,000,000 bushels, having reached some days 1,000,000 bushels and over, from the Atlantic coast alone. The encumbrances for late shipment also are from heavy contracts being made for as late as next February. This proves beyond a suspicion of doubt that Europe is at an extraordinary, and that this will in all probability be the case for some time in the history of the wheat market. The principal item of foreign news received is the actual production by Russia of the exportation of rice and rice flour, to go into effect August 25, and this new feature of the situation shows that conditions in that country are critical, and the action of the government has caused an advance in cereals of over Europe and America. Other news from abroad has been confined principally to reports of rains on the continent, which have interfered with harvesting operations, and of higher markets in England and France. The government agricultural report, issued on the 16th instant, was thoroughly satisfactory, but it has practically no effect on the market, as a good one had been expected, and consequently the government's figures are as follows: Condition of spring wheat August 15, 1901, against 53.2 last year; corn, against 53.1; oats, 53.1; against 50.1. Indicated approximate yield of wheat, 33.5 bushels per acre, against about 11 bushels last year; corn, 23.9 bushels per acre, against 19.2; oats, 20.2 bushels per acre, against 18.8. Prospective yield of winter wheat for 1901, 500,000,000 bushels; spring wheat, 150,000,000 bushels. Government estimate of total yield for August 15, 34,000,000 bushels, against 20,000,000 last year. Crops (for 1901) of corn, 2,000,000,000 bushels, and of oats, 650,000,000 bushels.

Corn has not enjoyed the active trade which has characterized the market for several weeks, but as a great part of the speculation in it has gone over to the wheat market, the market has been generally quiet. The condition of the grain crop is reported to have slightly improved with the more favorable weather of the past two days, although there are some complaints of slight damage to growth, as in many sections the under temperature has not been accompanied by any moisture.

Provisions started off with a continuation of last week's closing promise of better prices, but although trade was light, prices held very firm. Toward the close of the week, however, there was another break, which sent prices for the near options about \$10 per barrel. The occasion of this break was the lack of a sufficient number of orders, due to the fact that the public are becoming somewhat disgusted with the action of the market during the past few weeks, and as a consequence are inclined to make any further purchases in the lower level is reached.

Cotton.—The advance late last week, due primarily to a change of sentiment among the buyers, and increased with the relative cheapness of the staple and the attaching significance to recent reports of injury to the crop in some localities in the cotton states through excessive rains, has been succeeded by a sharp reaction, which is traceable partly to a favorable report of the agricultural bureau, partly to the generally cheerful tenor of the private crop advices from all parts of the South, and the condition of the crop in Texas is 20 per cent better than last year, while the acreage is 10 per cent larger. Private cables from Europe and the continent indicate a more substantial feeling among those interested in cotton. An improved condition of trade is noticeable, with a disposition on the part of the legitimate trade to invest on a basis of covering, and a consequent paying. It is of no material to crop prospects or the many predictions of over-production. Although Liverpool favored somewhat, as a result of the bearish tendency of the agricultural reports, quotations are held up remarkably by considering the intense pressure brought to bear by the short interest. Our New Orleans correspondents telegraph, under date of Thursday, that crop conditions west of the Mississippi river are brilliant; but, on Friday, heavy rains are again reported South, which has caused a fair amount of strength. Our New Orleans correspondent telegraphs, under date of Thursday, that crop conditions west of the Mississippi river are brilliant; but, on Friday, heavy rains are again reported South, which has caused a fair amount of strength. Our New Orleans correspondent telegraphs, under date of Thursday, that crop conditions west of the Mississippi river are brilliant; but, on Friday, heavy rains are again reported South, which has caused a fair amount of strength.

Coffee.—The week has been remarkable only for its dullness, both in options and for spot business. Some little flurry was caused on Thursday in options, owing to a dispatch from Rio, saying that rains were retarding receipts, and some new government regulation regarding loading of steamers would have the effect to delay shipments from that port. Receipts at Rio and Santos do not increase to any extent, thus enabling those markets to maintain their prices. A sale of 5500 bags, Thursday, 10,000, and freight in store, is the principal transaction for the week. This coffee will hardly be available for delivery in October. The stock in Rio is now 200,000 bags, and in Santos 54,000 bags; New York stock, 102,425 bags; United States, 108,100 bags; total, 258,000 bags. Total visible supply, 224,000 bags.

HORFORD'S ACID PHOSPHATE
Baking Contest.
HAMILTON, HAMILTON COUNTY, TEX., Aug. 15.—A grand baking contest took place at the Hamilton mill today, participated in by a great number of country as well as town ladies. Sixteen prizes were offered by the different business houses of the town, and competition was lively. Exactly fifty exhibits were handed in and numbered, and at 2:30 p. m. a committee of ladies selected by the county judge took charge of the office and affixed the ribbons.

BERLINER WEISS BEER.
Near Cor. Third and Houston Sts., Fort Worth.

to the leaves which they pronounced best, after which they threw open the doors to the anxiously waiting crowd. Honors were about evenly divided between the town and country ladies. About two hundred were present, and excitement ran high. Several conductors were constantly employed showing parties from top to bottom of the mill, and great interest was shown by the ladies in seeing all of the machinery of flour-making in actual operation. The mills are now running night and day under the management of the new proprietor, Mr. S. D. Felt, and what is pouring in from a large territory for sale and exchange. Two heavy teams are constantly employed delivering flour to adjoining towns. There are about 3000 bushels of choice wheat now on hand.

Stockholders Meeting of Merchants' National Bank to be held August 31, 1891.
At a meeting of the board of directors of the Merchants' National Bank held this day it was resolved that a meeting of the stockholders be held at their banking rooms, corner of Main and Sixth streets, on August 31, 1891, at 9 a. m. sharp, for the purpose of changing the title from that of the Merchants' National Bank of Fort Worth, Tex., to that of the National Bank of Commerce, Fort Worth, Tex., or to any other title that may be selected, and to reduce the capital stock. Also to transact any other business that may come before them.
All stockholders are earnestly requested to be present either in person or by proxy. By order of the board, A. B. SMITH, Cashier.

The Desert Lake.
SAN DIEGO, CAL., Aug. 19.—Frank McDonald, a prospector, just returned from a trip to the desert, states that about three miles from the junction of the new river and the Colorado a sand bar is forming, which divers the channel of the Colorado into the desert, and is gradually growing larger. Unless cut through the Colorado will flow permanently into the desert. The lake is still rising, but slowly, owing to the large area.

Victimized by Green Goods Men.
NEW YORK, Aug. 19.—George Williams, financial secretary of the Iron mining company of Zincite, Mo., was victimized by a green goods man named Allen, with a number of aliases. Williams paid \$305 for the packages of alleged greenbacks and expressed them to Zincite. Two newspaper men avowed him to the fact that he was swindled and Allen was arrested.
